We are an umbrella group including Coral Products (Mouldings) Ltd, Interpack Ltd, Tatra Rotalac Ltd and Global One Pak Ltd.

The extensive range of products supplied by our group feed into many different sectors including recycling, food waste and kerbside collection, food packaging, household, healthcare, telecoms and rail.

The varied sectors in which Coral Products Plc currently operate is testament to our versatility of our company, as well as an ability to adapt and restructure our markets in order to create growth and value for our shareholders.

As the business celebrates 30 years in British Manufacturing in 2019, we are investing in our future and that of our environment.

As a group we are establishing ourselves as a “plastics company with a conscience.”

We are developing within our group, enabling us to create a 360 circular economy efficient business structure, establishing an in house recycling plant, investing in new machinery and energy efficient systems, creating innovative design utilising recyclable materials with a focus on quality product development.

We have achieved Investors In People Status, developing our staff through training and participation within our business strategy has been key to our business plan.

The history of our company also brings to the forefront our ability to adapt in order to thrive in new and emerging markets.

As a business we are
“One to watch.”

Manufacturing Review 2019
